

How to get your Facebook App ID and Secret

Log into your FB account.

First of all you should have a Developers account. If you don't have one you may upgrade your account here <https://developers.facebook.com/docs/apps/register> (use Create Developer Account button). Once you're done follow this link <https://developers.facebook.com/>. You'll see such a window:

There choose “Add a new app” menu item in My Apps dropdown menu:

You'll see the next popup:

facebook for developers Products Docs Tools & Support News Case Studies Search My Apps

Create a New App ID

Follow the security check and you'll be redirected to the following page:

Get started with the “Facebook Login” option:

On the next page add <https://shopifier.net/app/social-sign-in/fb.php> link to the “Valid OAuth redirect URIs” field. Check that “Client OAuth Login” and “Web OAuth Login” options should be turned on:

Client OAuth Settings

☒ **Client OAuth Login**
Enables the standard OAuth client token flow. Secure your application and prevent abuse by locking down which token redirect URIs are allowed with the options below. Disable globally if not used. [?]

☒ **Web OAuth Login**
Enables web based OAuth client login for building custom login flows. [?]

☐ **Force Web OAuth Reauthentication**
When on, prompts people to enter their Facebook password in order to log in on the web. [?]

☐ **Embedded Browser OAuth Login**
Enables browser control redirect uri for OAuth client login. [?]

Valid OAuth redirect URIs

<https://shopifier.net/app/social-sign-in/fb.php>

☐ **Login from Devices**
Enables the OAuth client login flow for devices like a smart TV [?]

You'll see the Settings page:

The screenshot shows the Facebook App Settings page for a 'Login app'. The left sidebar contains navigation options: Dashboard, Settings (with 'Basic' and 'Advanced' sub-options), Roles, Alerts, App Review, PRODUCTS, Facebook Login, and + Add Product. The main content area displays the app's configuration details for APP ID: 1168775559845799. Fields include App ID, App Secret (with a 'Show' button), Display Name (set to 'Login app'), Namespace, App Domains, Contact Email (with a placeholder), Privacy Policy URL (with a placeholder), Terms of Service URL (with a placeholder), App Icon (1024 x 1024), and Category (set to 'Finance'). A '+ Add Platform' button is at the bottom. The footer shows 'facebook for developers' and 'Discard' / 'Save Changes' buttons.

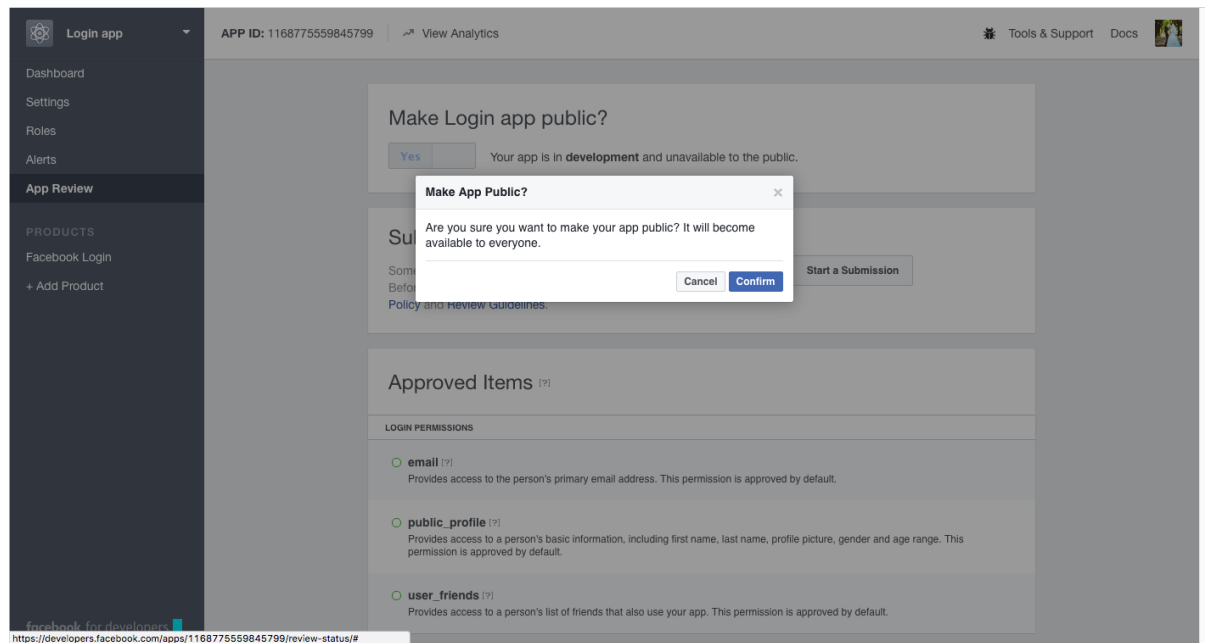

Here you can add any information for your app as well. And don't forget to save your changes.

Once you're done click "App Review" option in the left sidebar menu. You'll be redirected to the page where you can activate your app:

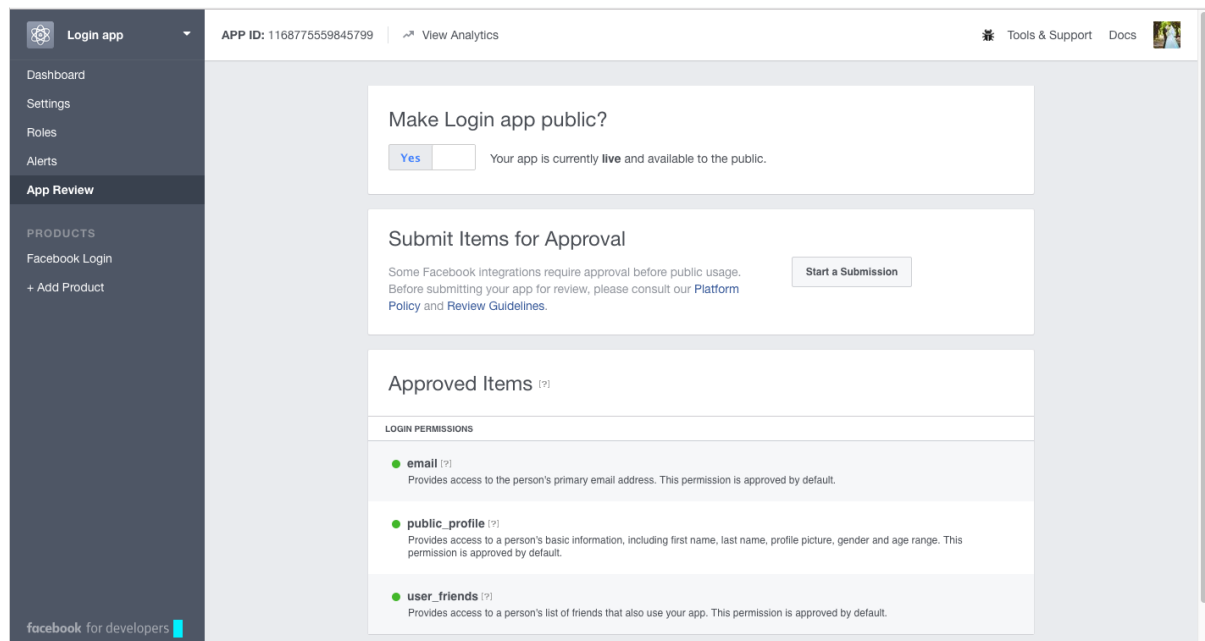

The screenshot shows the Facebook App Review page. The left sidebar is updated with 'App Review' selected under the 'Settings' section. The main content area features three sections: 1. 'Make Login app public?' with a 'No' button and a note that the app is in development. 2. 'Submit Items for Approval' with a 'Start a Submission' button and a link to Platform Policy and Review Guidelines. 3. 'Approved Items' with a table of login permissions. The table lists three permissions: 'email' (approved by default), 'public_profile' (approved by default), and 'user_friends' (approved by default).

| LOGIN PERMISSIONS | |
|---|--|
| <input checked="" type="radio"/> email | Provides access to the person's primary email address. This permission is approved by default. |
| <input checked="" type="radio"/> public_profile | Provides access to a person's basic information, including first name, last name, profile picture, gender and age range. This permission is approved by default. |
| <input checked="" type="radio"/> user_friends | Provides access to a person's list of friends that also use your app. This permission is approved by default. |

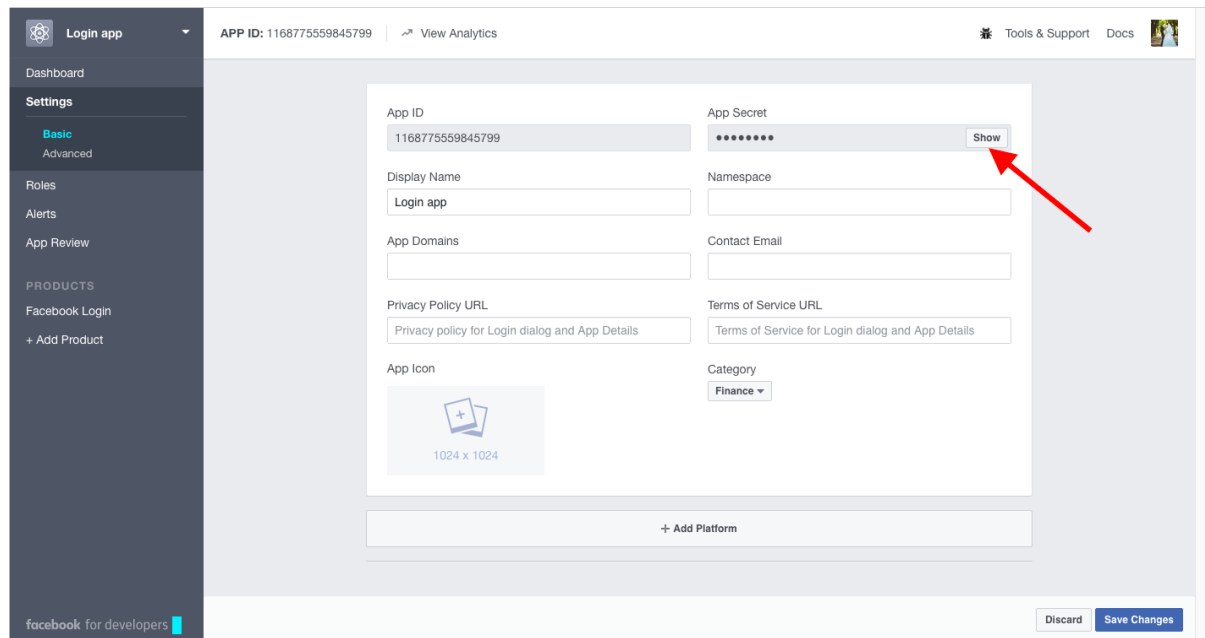

As you can see, your app is in the development mode. Make your app public. The following popup will be shown:

Click Confirm button. After that your app will be live and you can use it to login your customers:

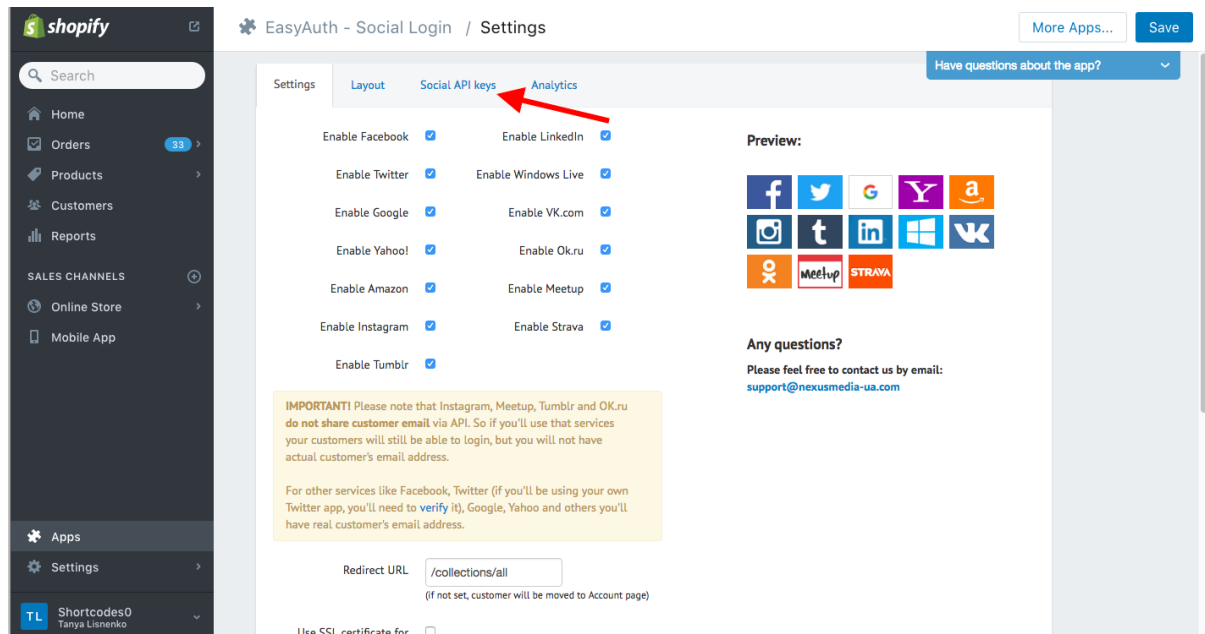

So now go to the Settings page to copy App ID and App Secret. On the following page click Show button to see the App Secret:

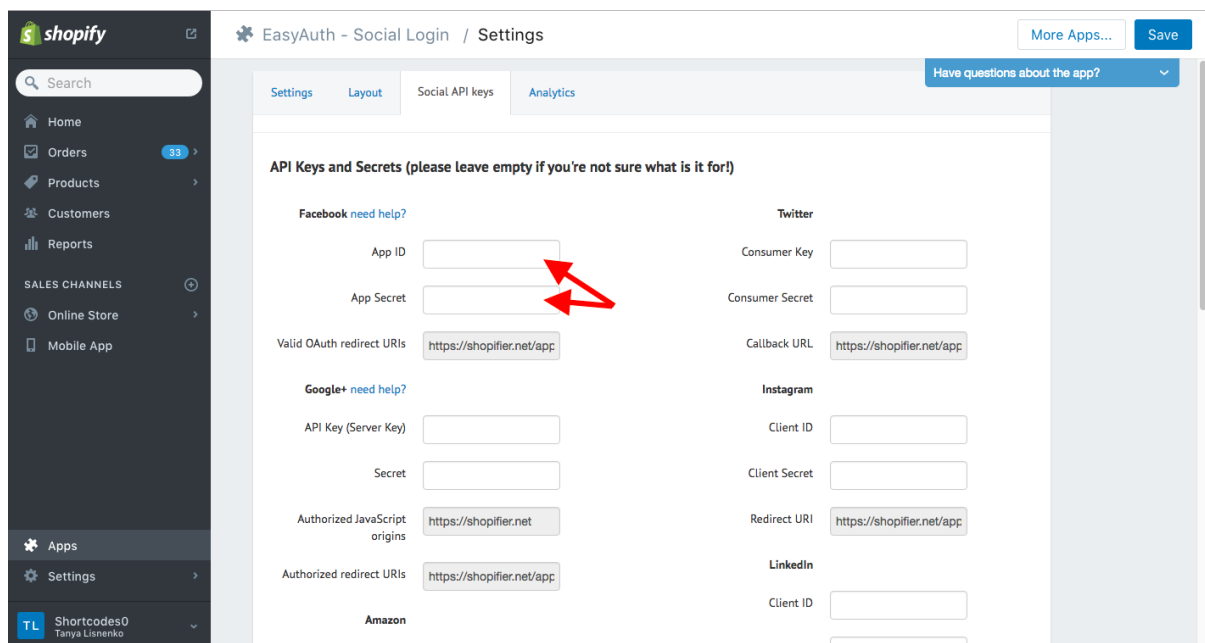

The screenshot displays the Facebook Login app settings interface. On the left is a dark sidebar with navigation links: Dashboard, Settings (with sub-links Basic and Advanced), Roles, Alerts, App Review, PRODUCTS, Facebook Login, and + Add Product. The main content area is titled 'Login app' and shows the 'APP ID: 1168775559845799' and a 'View Analytics' link. The settings are organized into two columns. The left column includes fields for App ID (1168775559845799), Display Name (Login app), App Domains, Privacy Policy URL (Privacy policy for Login dialog and App Details), and App Icon (1024 x 1024). The right column includes App Secret (masked with dots and a 'Show' button highlighted by a red arrow), Namespace, Contact Email, Terms of Service URL (Terms of Service for Login dialog and App Details), and Category (Finance). At the bottom, there is a '+ Add Platform' button and 'Discard' and 'Save Changes' buttons.

These are the App ID and App Secret you should use in the EasyAuth - Social Login app.

And now you should add them to the app settings. Go to your website Admin panel → Apps → EasyAuth - Social Login:

Go to the “Social API keys” tab and add the FB App ID and App Secret to the appropriate fields:

Save the changes:

shopify EasyAuth - Social Login / Settings
