

# How to add Mobile SDK API Key and Channel ID

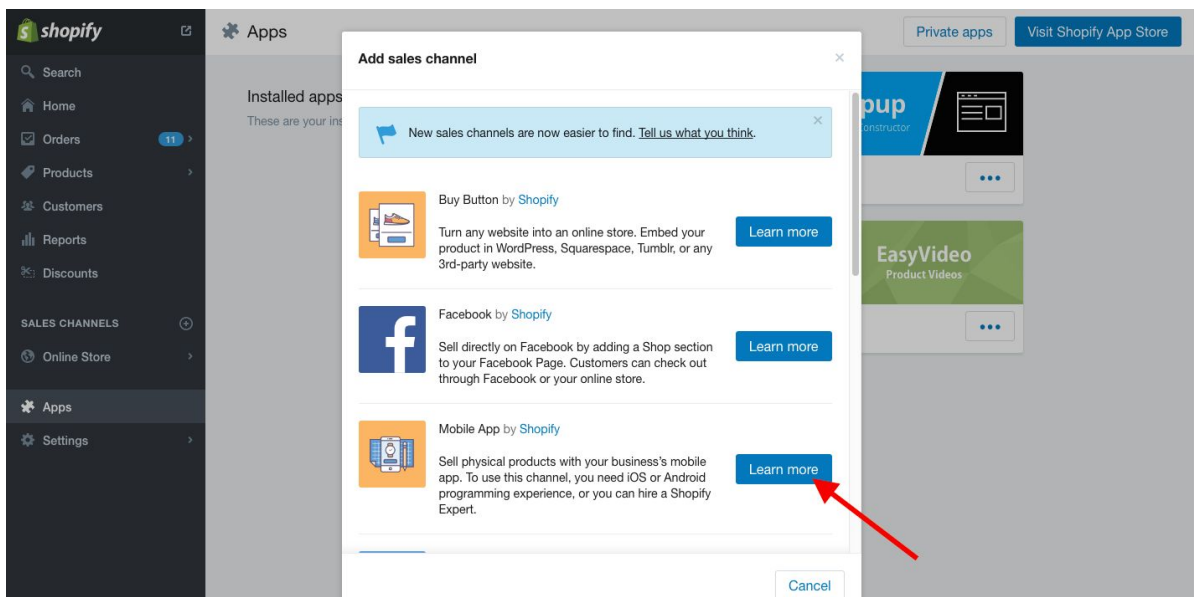

## Step 1 of 5

Please use “+” button in the Sales Channels menu to find Mobile SDK - API Key and Channel ID:

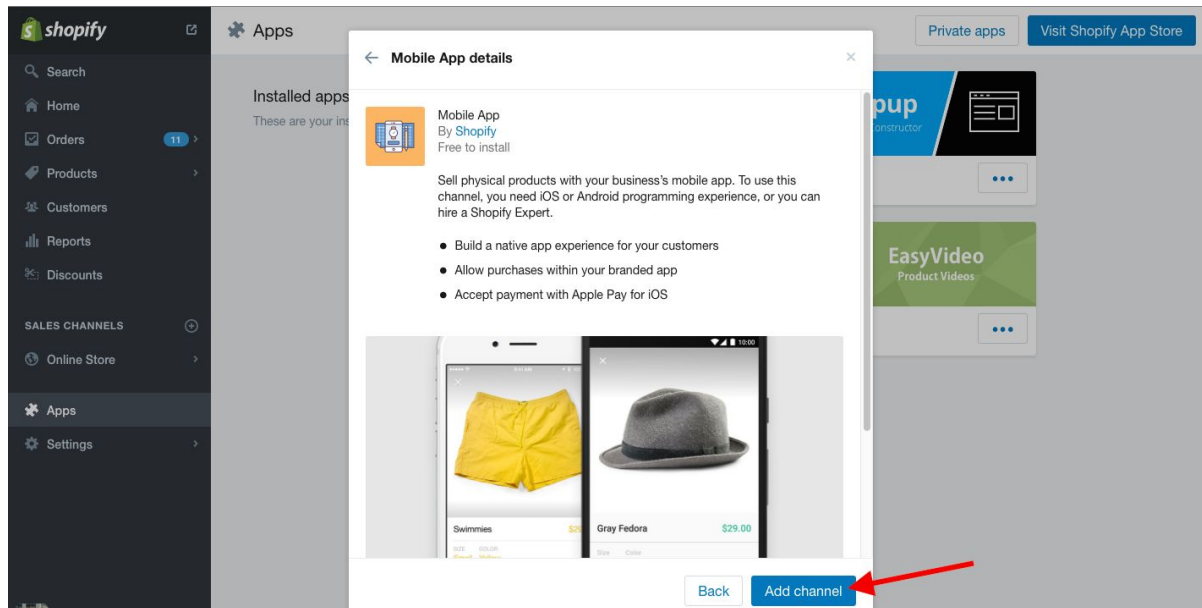

## Step 2 of 5

Choose Mobile App and click “Learn more” button in the shown popup:

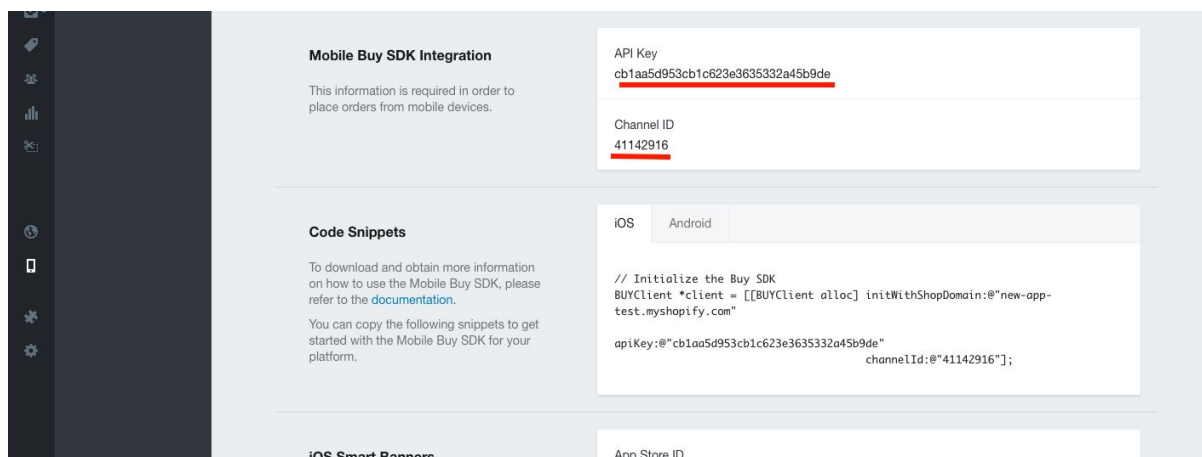

### Step 3 of 5

Click “Add Channel” button in the next popup:

### Step 4 of 5

After you're done go to the Mobile App → Integration page and here you'll find the “Mobile SDK - API Key” and “Channel ID” values for our app:

## Step 5 of 5

Copy and paste them to the appropriate fields of the app settings page and save changes:

The screenshot displays the Shopify admin interface for the EasyMobile app. On the left is a dark sidebar with the Shopify logo and navigation links: Search, Home, Orders (with a notification badge), Products, Customers, Reports, Discounts, SALES CHANNELS, Online Store, Mobile App, Apps (highlighted), and Settings. The main header shows 'EasyMobile' and a 'Help' button. The 'Core App Settings' section is active, with a sub-header 'Mobile App Name' and a text box containing 'New App Test'. Below this, a note states: 'This title will be displayed in Apple AppStore as your App's name'. Two input fields are present: 'Mobile SDK - API Key (where to find?)' containing 'cb1aa5d953cb1c623e3635332a45b9de' and 'Channel ID (where to find?)' containing '41142916'. A blue 'Save' button is located at the bottom right of the settings box, with a red arrow pointing to it.
